Toxicology 124 (1997) 235–238

TOXICOLOGY

Subject index

Volume 124 (1997)

Actinomycetes; Reactive oxygen species; NO; Cytotoxicity; Streptomycetes; Indoor air **124**, 105

Acute copper intoxication; Cu–Ca etilendinitrilotetracetic acid; Cu; Liver copper **124**, 173

Adjuvant; Diesel exhaust particles; Carbon black; IgE **124**, 225

Airway; Toluene diisocyanate; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Allergic asthma; Konjac flour; Yam flour; Konjac gum; Pulmonary hypersensitivity **124**, 115

Antioxidant enzymes; Carbonyl iron; Dietary α-tocopherol; Ubiquinols **124**, 73

Antioxidant enzymes; Tocopherol acetate; Lead; Type-I iodothyronine 5′ monodeiodinase; Thyroxine; Triiodothyronine; Lipid peroxidation **124**, 203

Apoptosis; Menadione; Cardiotoxicity; Renal toxicity **124**, 193

Apoptosis; Mercury; Mitochondrial membrane permeability transition; Glutathione **124**, 211

Behavioral thermoregulation; Temperature regulation; Temperature gradient; Motor activity; Hypothermia; Hyperthermia; Fever **124**, 165

Biomarkers; Cytochrome P450 1A1; Dioxin; Lymphocytes; Protein kinase C **124**, 39

Bromodichloromethane; Physiologically based modeling; Rates of metabolism; Water disinfection by-products **124**, 141

Calcium channel inhibitors; Hepatocytes; Nicardipine; Nickel uptake; Vasopressin; Verapamil **124**, 21

Capsaicin; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Irritant **124**, 83

Carbon black; Diesel exhaust particles; IgE; Adjuvant **124**, 225

Carbonyl iron; Antioxidant enzymes; Dietary α-tocopherol; Ubiquinols **124**, 73

Carcinogenesis; Piperonyl butoxide; Hepatocellular carcinoma; Hemangiosarcoma; Mice **124**, 95

Cardiotoxicity; Menadione; Apoptosis; Renal toxicity **124**, 193

C57BL/6J mice; TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Vitamin E succinate; Lipid peroxidation; DNA damage; Placenta; Fetus **124**, 27

Chloroform; Dichloroacetic acid; In vitro bioactivation; SKF 525-A; Piperonyl butoxide **124**, 53

Chloroform; Dichloroacetic acid; Potentiation of hepatotoxicity; Covalent binding; Glutathione content; Cytochrome P450 content **124**, 63

Covalent binding; Chloroform; Dichloroacetic acid; Potentiation of hepatotoxicity; Glutathione content; Cytochrome P450 content **124**, 63

Cu–Ca etilendinitrilotetracetic acid; Acute copper intoxication; Cu; Liver copper **124**, 173

Cu; Cu–Ca etilendinitrilotetracetic acid; Acute copper intoxication; Liver copper **124**, 173

CYP2B subfamily; Cytochrome P450; Monoterpenes; Essential oils; Xenobiotic metabolism; Drug interactions **124**, 135

Cytochrome P450 1A1; Dioxin; Lymphocytes; Protein kinase C; Biomarkers **124**, 39

0300-483X/97/$17.00 © 1997 Elsevier Science Ireland Ltd. All rights reserved.

PII S0300-483X(97)00176-5

Cytochrome P450 content; Chloroform; Dichloroacetic acid; Potentiation of hepatotoxicity; Covalent binding; Glutathione content **124**, 63

Cytochrome P450; CYP2B subfamily; Monoterpenes; Essential oils; Xenobiotic metabolism; Drug interactions **124**, 135

Cytotoxicity; MTS assay; Human cell lines; Risk assessment; MEIC **124**, 179

Cytotoxicity; Reactive oxygen species; NO; Actinomycetes; Streptomycetes; Indoor air **124**, 105

Dichloroacetic acid; Chloroform; In vitro bioactivation; SKF 525-A; Piperonyl butoxide **124**, 53

Dichloroacetic acid; Chloroform; Potentiation of hepatotoxicity; Covalent binding; Glutathione content; Cytochrome P450 content **124**, 63

Diesel exhaust particles; Carbon black; IgE; Adjuvant **124**, 225

Dietary α-tocopherol; Antioxidant enzymes; Carbonyl iron; Ubiquinols **124**, 73

Dioxin; Cytochrome P450 1A1; Lymphocytes; Protein kinase C; Biomarkers **124**, 39

DNA damage; TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Vitamin E succinate; Lipid peroxidation; C57BL/6J mice; Placenta; Fetus **124**, 27

Drug interactions; Cytochrome P450; CYP2B subfamily; Monoterpenes; Essential oils; Xenobiotic metabolism **124**, 135

Ellagic acid; TCDD; Fetotoxicity; Oxidative stress; Vitamin E succinate; Lipid peroxidation; DNA damage; C57BL/6J mice; Placenta; Fetus **124**, 27

Embryo culture; Toxaphene congeners; Embryotoxicity **124**, 153

Embryotoxicity; Toxaphene congeners; Embryo culture **124**, 153

Epithelium; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Essential oils; Cytochrome P450; CYP2B subfamily; Monoterpenes; Xenobiotic metabolism; Drug interactions **124**, 135

Fetotoxicity; TCDD; Oxidative stress; Ellagic acid; Vitamin E succinate; Lipid peroxidation; DNA damage; C57BL/6J mice; Placenta; Fetus **124**, 27

Fetus; TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Vitamin E succinate; Lipid peroxidation; DNA damage; C57BL/6J mice; Placenta **124**, 27

Fever; Temperature regulation; Temperature gradient; Behavioral thermoregulation; Motor activity; Hypothermia; Hyperthermia **124**, 165

F344 rats; Nephrotoxicity; Halogenated hydrocarbons; Urinary bladder toxicity **124**, 125

Glutathione content; Chloroform; Dichloroacetic acid; Potentiation of hepatotoxicity; Covalent binding; Cytochrome P450 content **124**, 63

Glutathione disulfide; Oxidative stress; Reducing equivalents; Glutathione; Heart **124**, 11

Glutathione; Mercury; Apoptosis; Mitochondrial membrane permeability transition **124**, 211

Glutathione; Oxidative stress; Reducing equivalents; Glutathione disulfide; Heart **124**, 11

Guinea-pig; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Occupational asthma; Irritant; Capsaicin **124**, 83

Halogenated hydrocarbons; Nephrotoxicity; F344 rats; Urinary bladder toxicity **124**, 125

Heart; Oxidative stress; Reducing equivalents; Glutathione; Glutathione disulfide **124**, 11

Hemangiosarcoma; Piperonyl butoxide; Hepatocellular carcinoma; Carcinogenesis; Mice **124**, 95

Hepatocellular carcinoma; Piperonyl butoxide; Hemangiosarcoma; Carcinogenesis; Mice **124**, 95

Hepatocytes; Calcium channel inhibitors; Nicardipine; Nickel uptake; Vasopressin; Verapamil **124**, 21

Human cell lines; MTS assay; Cytotoxicity; Risk assessment; MEIC **124**, 179

Hyperreactivity; Toluene diisocyanate; Airway; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Hyperthermia; Temperature regulation; Temperature gradient; Behavioral thermoregulation; Motor activity; Hypothermia; Fever **124**, 165

Hypothermia; Temperature regulation; Temperature gradient; Behavioral thermoregulation; Motor activity; Hyperthermia; Fever **124**, 165

IgE; Diesel exhaust particles; Carbon black; Adjuvant **124**, 225

Indoor air; Reactive oxygen species; NO; Cytotoxicity; Actinomycetes; Streptomycetes **124**, 105

In vitro bioactivation; Chloroform; Dichloroacetic acid; SKF 525-A; Piperonyl butoxide **124**, 53

Irritant; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Capsaicin **124**, 83

Konjac flour; Yam flour; Konjac gum; Pulmonary hypersensitivity; Allergic asthma **124**, 115

Konjac gum; Konjac flour; Yam flour; Pulmonary hypersensitivity; Allergic asthma **124**, 115

Lead; Tocopherol acetate; Type-I iodothyronine 5′ monodeiodinase; Thyroxine; Triiodothyronine; Lipid peroxidation; Antioxidant enzymes **124**, 203

Lipid peroxidation; TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Vitamin E succinate; DNA damage; C57BL/6J mice; Placenta; Fetus **124**, 27

Lipid peroxidation; Tocopherol acetate; Lead; Type-I iodothyronine 5′ monodeiodinase; Thyroxine; Triiodothyronine; Antioxidant enzymes **124**, 203

Liver copper; Cu–Ca etilendinitrilotetracetic acid; Acute copper intoxication; Cu **124**, 173

Lymphocytes; Cytochrome P450 1A1; Dioxin; Protein kinase C; Biomarkers **124**, 39

MEIC; MTS assay; Cytotoxicity; Human cell lines; Risk assessment **124**, 179

Menadione; Apoptosis; Cardiotoxicity; Renal toxicity **124**, 193

Mercury; Apoptosis; Mitochondrial membrane permeability transition; Glutathione **124**, 211

Metallothionein; Zinc and copper; MT-I/MT-II gene knockout mouse; MT-I overexpressor transgenic mouse; *Toxic milk* mutant mouse **124**, 1

Methacholine; Toluene diisocyanate; Airway; Hyperreactivity; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Mice; Piperonyl butoxide; Hepatocellular carcinoma; Hemangiosarcoma; Carcinogenesis **124**, 95

Mitochondrial membrane permeability transition; Mercury; Apoptosis; Glutathione **124**, 211

Monoterpenes; Cytochrome P450; CYP2B subfamily; Essential oils; Xenobiotic metabolism; Drug interactions **124**, 135

Motor activity; Temperature regulation; Temperature gradient; Behavioral thermoregulation; Hypothermia; Hyperthermia; Fever **124**, 165

MT-I/MT-II gene knockout mouse; Metallothionein; Zinc and copper; MT-I overexpressor transgenic mouse; *Toxic milk* mutant mouse **124**, 1

MT-I overexpressor transgenic mouse; Metallothionein; Zinc and copper; MT-I/MT-II gene knockout mouse; *Toxic milk* mutant mouse **124**, 1

MTS assay; Cytotoxicity; Human cell lines; Risk assessment; MEIC **124**, 179

Nephrotoxicity; Halogenated hydrocarbons; F344 rats; Urinary bladder toxicity **124**, 125

Nicardipine; Calcium channel inhibitors; Hepatocytes; Nickel uptake; Vasopressin; Verapamil **124**, 21

Nickel uptake; Calcium channel inhibitors; Hepatocytes; Nicardipine; Vasopressin; Verapamil **124**, 21

NO; Reactive oxygen species; Cytotoxicity; Actinomycetes; Streptomycetes; Indoor air **124**, 105

Occupational asthma; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Irritant; Capsaicin **124**, 83

Oxidative stress; Reducing equivalents; Glutathione; Glutathione disulfide; Heart **124**, 11

Oxidative stress; TCDD; Fetotoxicity; Ellagic acid; Vitamin E succinate; Lipid peroxidation; DNA damage; C57BL/6J mice; Placenta; Fetus **124**, 27

Perfused trachea; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Physiologically based modeling; Bromodichloromethane; Rates of metabolism; Water disinfection by-products **124**, 141

Piperonyl butoxide; Chloroform; Dichloroacetic acid; In vitro bioactivation; SKF 525-A **124**, 53

Piperonyl butoxide; Hepatocellular carcinoma; Hemangiosarcoma; Carcinogenesis; Mice **124**, 95

Placenta; TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Vitamin E succinate; Lipid peroxidation; DNA damage; C57BL/6J mice; Fetus **124**, 27

Potentiation of hepatotoxicity; Chloroform; Dichloroacetic acid; Covalent binding; Glutathione content; Cytochrome P450 content **124**, 63

Protein kinase C; Cytochrome P450 1A1; Dioxin; Lymphocytes; Biomarkers **124**, 39

Pulmonary hypersensitivity; Konjac flour; Yam flour; Konjac gum; Allergic asthma **124**, 115

Rates of metabolism; Bromodichloromethane; Physiologically based modeling; Water disinfection by-products **124**, 141

Reactive oxygen species; NO; Cytotoxicity; Actinomycetes; Streptomycetes; Indoor air **124**, 105

Reducing equivalents; Oxidative stress; Glutathione; Glutathione disulfide; Heart **124**, 11

Renal toxicity; Menadione; Apoptosis; Cardiotoxicity **124**, 193

Risk assessment; MTS assay; Cytotoxicity; Human cell lines; MEIC **124**, 179

SKF 525-A; Chloroform; Dichloroacetic acid; In vitro bioactivation; Piperonyl butoxide **124**, 53

Smooth muscle; Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Perfused trachea; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Streptomycetes; Reactive oxygen species; NO; Cytotoxicity; Actinomycetes; Indoor air **124**, 105

TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Vitamin E succinate; Lipid peroxidation; DNA damage; C57BL/6J mice; Placenta; Fetus **124**, 27

Temperature gradient; Temperature regulation; Behavioral thermoregulation; Motor activity; Hypothermia; Hyperthermia; Fever **124**, 165

Temperature regulation; Temperature gradient; Behavioral thermoregulation; Motor activity; Hypothermia; Hyperthermia; Fever **124**, 165

Thyroxine; Tocopherol acetate; Lead; Type-I iodothyronine 5′ monodeiodinase; Triiodothyronine; Lipid peroxidation; Antioxidant enzymes **124**, 203

Tocopherol acetate; Lead; Type-I iodothyronine 5′ monodeiodinase; Thyroxine; Triiodothyronine; Lipid peroxidation; Antioxidant enzymes **124**, 203

Toluene diisocyanate; Airway; Hyperreactivity; Methacholine; Epithelium; Smooth muscle; Perfused trachea; Guinea-pig; Occupational asthma; Irritant; Capsaicin **124**, 83

Toxaphene congeners; Embryotoxicity; Embryo culture **124**, 153

***Toxic milk* mutant mouse**; Metallothionein; Zinc and copper; MT-I/MT-II gene knockout mouse; MT-I overexpressor transgenic mouse **124**, 1

Triiodothyronine; Tocopherol acetate; Lead; Type-I iodothyronine 5′ monodeiodinase; Thyroxine; Lipid peroxidation; Antioxidant enzymes **124**, 203

Type-I iodothyronine 5′ monodeiodinase; Tocopherol acetate; Lead; Thyroxine; Triiodothyronine; Lipid peroxidation; Antioxidant enzymes **124**, 203

Ubiquinols; Antioxidant enzymes; Carbonyl iron; Dietary α-tocopherol **124**, 73

Urinary bladder toxicity; Nephrotoxicity; Halogenated hydrocarbons; F344 rats **124**, 125

Vasopressin; Calcium channel inhibitors; Hepatocytes; Nicardipine; Nickel uptake; Verapamil **124**, 21

Verapamil; Calcium channel inhibitors; Hepatocytes; Nicardipine; Nickel uptake; Vasopressin **124**, 21

Vitamin E succinate; TCDD; Fetotoxicity; Oxidative stress; Ellagic acid; Lipid peroxidation; DNA damage; C57BL/6J mice; Placenta; Fetus **124**, 27

Water disinfection by-products; Bromodichloromethane; Physiologically based modeling; Rates of metabolism **124**, 141

Xenobiotic metabolism; Cytochrome P450; CYP2B subfamily; Monoterpenes; Essential oils; Drug interactions **124**, 135

Yam flour; Konjac flour; Konjac gum; Pulmonary hypersensitivity; Allergic asthma **124**, 115

Zinc and copper; Metallothionein; MT-I/MT-II gene knockout mouse; MT-I overexpressor transgenic mouse; *Toxic milk* mutant mouse **124**, 1
